

Stiel Tuesday - evening

Franklin 1, 15

Well, you are astonished at the mail you are getting from me. But I am a good girl + one by one clearing everything away, now that that document is done.

Enclosed is the abortion document. The corrections I made are mainly for flow in English. I think it ~~follows~~ follows the first document admirably + should be published together. Of course we don't deal in it with the ownership & control over the uterus by capital, that the state owns all children from birth, etc. But all this is implied. And it is Italian but through that international. I think it's good.

I'd like to know more about the journal that plans to publish ~~the~~ #1 in the US - I mentioned the name I thought it was - International Socialist Review - + she told me it was Trotskyist. Next only would that not be a good idea, but we will have no guarantee that they will not edit it. I finally read the article of mine in that book + found they had edited it mercilessly + never said a word to me. Thank God the left is not in power - or perhaps they are.

I'd also like to know how it is to be signed - from Padova, by the Institute, by you, so I can begin to examine plans to publish it here.

There is also in the US the press that Barbara works at + they have been waiting for an article by me for a year. I think they would consider this. I should add that the Trotskyists might not like our point of view or, worse, they might use it against their own women. Who knows what goes on in their heads? Maybe Ferruccio.

Anyway I am not so sad as I was this morning, + am taking charge of things again. What I find puzzling is that either you dominate people or they dominate you. We seem not to be so good at the autonomy.

Love from your autonomous friend  
(and affection!)

S.

You must tell Ferruccio that I wait every morning for his letter, but when it does not arrive I always know it is because he is pressed + feel bad on both counts.

also enclosed: original so you can check changes.
