Hejsan! Four dwarves in the Swedish forest are looking for Little Snow-White.

Actually we are three boys who want to make life worth living for "our" three-year-old son. Do you know any female who might be willing to help us ? It is really urgent. And it is not that we are longing for a girl in general or that we don't like to do so-called female work. As you probably know men are told to be bad mothers. So we need a female for two reasons: mainly for the sake of authorities and (I am sorry) for we still have to learn certain things.
